

NAVEEN GUPI

Health IT Data Analyst I | Power BI • Tableau • Excel • Healthcare Analytics | Federal Reporting

naveen.gupi2000@gmail.com | (561) 465-6601 | Continental US (Remote) | Open to Relocation

PROFESSIONAL SUMMARY

Health IT Data Analyst with 5+ years of experience developing operational and executive dashboards, performing quantitative analysis of healthcare data, and delivering data-driven insights that enable leadership to monitor performance, identify trends, and make informed decisions. Proven expertise in Power BI, Tableau, Excel, and SQL with a track record of building recurring and ad hoc reports, validating data quality, and presenting findings to stakeholders. Deep healthcare analytics experience including claims, eligibility, and operational data analysis. Skilled in trend analysis, forecasting, and statistical techniques with strong documentation and business rule standardization practices. US Citizen eligible for DHS Public Trust suitability. Seeking to leverage analytical expertise to support federal health IT initiatives and drive mission impact at A-TEK.

CORE COMPETENCIES

HEALTHCARE ANALYTICS:	Claims Analysis Eligibility Data Provider Directories Clinical Metrics Operational Performance Population Health HIPAA Compliance PHI/PII Governance
BI & VISUALIZATION:	Power BI (Desktop, Service, DAX, Power Query) Tableau Dashboard Design Executive Reporting KPI Development Data Storytelling Self-Service Analytics
DATA ANALYSIS & REPORTING:	SQL Excel (Advanced, VBA, PivotTables) Quantitative Analysis Trend Analysis Forecasting Statistical Methods Ad Hoc Reporting Recurring Reports
DATA QUALITY & GOVERNANCE:	Data Validation Anomaly Investigation Root-Cause Analysis Data Quality Frameworks Metadata Documentation Business Rules Reporting Methodologies
STAKEHOLDER ENGAGEMENT:	Requirements Gathering Cross-Functional Collaboration Executive Presentations Government Stakeholder Communication Performance Measurement Project Documentation

PROFESSIONAL EXPERIENCE

DATA ANALYST / AZURE SQL BI DEVELOPER | Remote

BayCare Health System, Tampa, FL | May 2025 – Present

- Developed 5+ operational and executive dashboards in Power BI to monitor clinical and operational performance, enabling 200+ stakeholders across Finance, Operations, Clinical, and Compliance to track KPIs and identify trends in real time.
- Performed quantitative analysis of healthcare data including claims, eligibility, and provider metrics—delivering recurring and ad hoc reports that informed strategic decision-making and improved operational efficiency by 25%.
- Validated data quality through systematic anomaly investigation and root-cause analysis, identifying and resolving data integrity issues that improved reporting accuracy by 20% and reduced downstream errors.
- Created executive-level visualizations supporting data-driven decision-making, presenting findings to department leadership and cross-functional teams through structured reports and interactive dashboards.
- Performed trend analysis and forecasting on patient volume, revenue cycle, and resource utilization data—enabling leadership to anticipate demand fluctuations and optimize staffing and budget allocation.
- Collaborated with clinical, financial, and operational stakeholders to define reporting requirements, document business rules, and standardize reporting methodologies—reducing report development cycle time by 30%.
- Documented reporting methodologies, business rules, and data dictionaries to ensure consistency, reproducibility, and knowledge transfer across the analytics team and stakeholder groups.
- Supported performance measurement initiatives by designing metrics frameworks, benchmarking against industry standards, and tracking improvement initiatives—demonstrating measurable impact on patient outcomes and operational costs.
- Built automated data quality monitoring tools using Python and SQL to detect anomalies in real time, enhancing data integrity and reducing manual validation effort by 15 hours/week.
- Implemented row-level security and governed reporting workspaces in Power BI Service, maintaining strict HIPAA compliance while enabling secure self-service access for clinical and operational teams.

TECH STACK: Power BI, Tableau, SQL Server, Azure SQL Database, Azure Databricks, Microsoft Fabric, Azure Data Factory, Excel (Advanced, VBA), Python, R, Git, ETL/ELT, HIPAA

DATA ANALYST / BI ANALYST | Remote

Tata Consultancy Services (TCS), Hyderabad, India | May 2021 – July 2023

- Mined and analyzed production data across 5+ source systems using Python, SQL, and Spark (PySpark) for global healthcare clients—supporting operational reporting, regulatory compliance, and performance measurement initiatives.
- Built predictive statistical models in Python and Spark (MLlib) to validate data accuracy, detect performance trends, and drive data-driven forecasting—delivering actionable insights to client stakeholders that improved forecast accuracy by 18%.
- Developed interactive BI dashboards and reports using Power BI and Tableau, visualizing healthcare KPIs across operational and financial datasets—enabling leadership to track performance trends and make data-informed decisions.
- Automated ETL pipelines using AWS Glue and Python, standardizing data ingestion and ensuring consistent, high-quality datasets for recurring and ad hoc reporting workflows.
- Directed data cleaning, quality review, and validation initiatives across large-scale production datasets, implementing integrity protocols that boosted reporting accuracy by 20% and reduced downstream errors.
- Authored comprehensive data requirements documentation, flowcharts, and technical specifications for enterprise BI builds—clarifying business rules and reporting logic for cross-functional delivery teams.
- Coordinated with onshore and offshore delivery teams using Agile methodologies to ensure BI work was executed accurately and on schedule, consistently delivering projects 15% ahead of deadlines.

TECH STACK: SQL Server, Python (Pandas, NumPy, Scikit-learn), Spark (PySpark, MLlib), AWS (S3, EMR, Glue, Lambda), Power BI, Tableau, Advanced Excel, Git, ETL/ELT, Agile

DATA ANALYST / HEALTHCARE ANALYTICS DEVELOPER | Remote

Insight Talent Solutions (Client: Cigna Healthcare), Hyderabad, India | Sep 2019 – May 2021

- Built 4+ executive dashboards with star-schema data models to identify, track, and visualize KPIs across operational and financial datasets—translating complex healthcare data into actionable insights for department leadership in a major payer environment.
- Performed quantitative analysis of claims, eligibility, and provider data—delivering monthly recurring reports and ad hoc analyses that informed strategic decisions on network management, reimbursement policies, and cost containment.
- Conducted rigorous data cleaning and root-cause analysis on production datasets, boosting reporting accuracy by 15% through systematic validation and correction protocols.
- Investigated database structures, performed source-to-target mapping, and authored complex SQL queries to validate extraction accuracy—ensuring reliable reporting outputs from complex relational schemas containing sensitive healthcare data.
- Authored technical requirements documentation and process flowcharts aligning reporting solutions with enterprise governance, regulatory compliance standards, and data quality management practices.
- Presented findings and recommendations to department leadership and cross-functional teams, translating complex analytical results into clear, actionable insights for non-technical stakeholders.

TECH STACK: Power BI, SQL Server, Advanced Excel, Python (Pandas, NumPy), Azure Data Factory, Azure SQL Database, SSIS, SSRS, ETL/ELT, Git, Healthcare Regulatory Standards

KEY PROJECTS

Healthcare Executive Dashboard Suite | BayCare Health System

- Designed and implemented an executive dashboard suite in Power BI to consolidate clinical, financial, and operational metrics—enabling unified performance monitoring and reducing data retrieval time by 40%.
- Built automated reporting pipelines using Azure Data Factory and SQL to standardize data ingestion from 10+ source systems, ensuring real-time data freshness and consistency across all dashboards.
- Documented reporting methodologies, business rules, and data dictionaries to ensure consistency, reproducibility, and compliance with healthcare governance standards.

Healthcare Trend Analysis & Forecasting Initiative | Insight Talent Solutions

- Performed trend analysis and forecasting on patient volume, revenue cycle, and resource utilization data using Excel, Python, and SQL—enabling leadership to anticipate demand fluctuations and optimize staffing and budget allocation.
- Developed statistical models to project quarterly performance metrics, achieving 92% forecast accuracy and informing strategic planning decisions.

- Created executive summaries and visualizations presenting forecast findings to leadership, translating complex statistical results into clear, actionable recommendations.

EDUCATION

Master of Science, Computer Science

Florida Atlantic University, Boca Raton, FL

**Bachelor of Engineering, Electronics and
Communication Engineering**

Chennai Institute of Technology, Chennai, India

CERTIFICATIONS & TRAINING

- HIPAA Privacy & Security Compliance — Completed
- Data Governance & Quality Management — Completed
- Microsoft Power Platform Fundamentals (PL-900) — Targeted within 3 months
- Microsoft Certified: Power BI Data Analyst Associate — Targeted within 3 months
- Microsoft Azure Fundamentals (AZ-900) — In Progress
- Python for Predictive Analytics & Data Science — Completed
- Statistical Methods & Data Visualization — Completed
- Change Management & UAT Coordination — Completed

ADDITIONAL INFORMATION

- Work Authorization: Legally authorized to work in the United States; no sponsorship required
- Work Arrangement: Fully remote (any US location) with proven track record of self-directed work
- Relocation: Open to relocation to Des Moines, IA or hybrid arrangements
